

Enriching Student Experience

”

By mastering academic English, it can help us with our university assignments. We were given homework, presentation projects, language knowledge lessons, and writing assignments. These have helped me understand what academic English is really all about. All the lecturers were nice and patient. They made sure that we fully understood every lesson. I have become more confident to speak in front of people and made many new friends!

Jocelyn Lim

I believe that quite a number of students are unsure of how they can improve their English for their university studies. The University English Programme at UoRM is the answer. Personally speaking, the programme has been very helpful in letting me hone my ability to write and speak academically. I highly recommend students who are looking to improve their English for academic use to join the programme. It is quite an interesting, enjoyable, and knowledge-filled programme.

UNIVERSITY ENGLISH

Develop your confidence in English communication and academic skills to succeed at university!

English proficiency is a must.
The top 5 skills that employers place importance on when it comes to newly-hired graduates were oral and written communication, critical thinking, English proficiency, interpersonal skills and flexibility or adaptability skills.

Datuk Dr Syed Hussain Syed Husman
President of Malaysian Employers Federation (MEF)
